Duties: Installs, troubleshoots, repairs, modifies and maintains material handling equipment and associated components. Observes construction operation and system interfaces, and functional requirements. Performs scheduled maintenance, maintenance calibration, preventative maintenance, and system performance checks to insure proper operation, e.g., assemblies, realigns, and arranges equipment and connects cables, hydraulic lines, pneumatic tubes, and connecting mechanisms between units. Uses hand and power tools of the trade and required test equipment to keep the system operational. May be required to fabricate parts for the material handling equipment. Analyzes and evaluates recommended or projected changes in mechanical operations to improve functional performance and system throughput. Reviews submittals from contractor for compliance to government technical specifications to insure documentation is adequate. Performs other duties as assigned.
